What you do:

- When someone deposits gold with you, take it into your vault, fill out a voucher for the deposited amount minus the 10% fee, sign it, and hand it to them.
- When someone arrives with a voucher issued at another branch, check the signature, pay them the voucher amount in gold from your vault, and record the redemption.
- Keep your ledger updated. Every deposit in, every payout out, running balance.
- If your vault hits zero, your branch closes for the rest of the round.

You are also the rule-keeper. If anyone has a question about how the network works, your answer is the answer.
